Wireless Microphone System Frequency Lists

TV1417

The following tables show the channels and frequencies that are selectable on your wireless microphones, transmitters, and receivers.
For the setting procedures of the channel/frequency on your units, refer to the Operating Instructions supplied with the units.

Group 00

The group 00 permits the units to operate on any of 47 carrier frequencies in 125-kHz steps of TV channels 14 to 17.

Note

Simultaneous multi-channel operation is not assured with this group.

Grouping for multi-channel system

When building up a multi-channel system, Sony recommends that one of the following groups is selected to avoid mutual interference from other Sony wireless microphones/transmitters:
- Groups 01 to 04 are for using 8 channels of transmitting frequencies in one TV channel.
- Groups 05 to 08 are for using 11 channels of transmitting frequencies in two TV channels.
- Group 09 is for using 16 channels of transmitting frequencies in four TV channels.

Group 14 to 17 (channel spacing: 25 kHz)

Groups 14, 15, 16 and 17 permit the units to operate on 231 carrier frequencies in 25-kHz steps of TV channels 14 to 17.

Notes

- On shaded channels in the tables below cannot be used. The indication of these channels does not appear in the display of the device.
- Simultaneous multi-channel operation is not assured with these groups.

Grouping for multi-channel system

When building up a multi-channel system, Sony recommends that one of the following groups is selected to avoid mutual interference from other Sony wireless microphones/transmitters:

– Groups 01 to 04 are for using 8 channels of transmitting frequencies in one TV channel.
– Groups 05 to 08 are for using 11 channels of transmitting frequencies in two TV channels.
– Group 09 is for using 16 channels of transmitting frequencies in four TV channels.

Group 18 to 21 (channel spacing: 25 kHz)

Groups 18, 19, 20 and 21 permit the units to operate on 231 carrier frequencies in 25-kHz steps of TV channels 18 to 21.

Notes

- On shaded channels in the tables below cannot be used. The indication of these channels does not appear in the display of the device.
- Simultaneous multi-channel operation is not assured with these groups.

TV2225

The following tables show the channels and frequencies that are selectable on your wireless microphones, transmitters, and receivers.
For the setting procedures of the channel/frequency on your units, refer to the Operating Instructions supplied with the units.

Group 00

The group 00 permits the units to operate on any of 47 carrier frequencies in 125-kHz steps of TV channels 22 to 25.

Notes

- Simultaneous multi-channel operation is not assured with this group.
- The UC25 model only supports use of TV-25.

Grouping for multi-channel system

When building up a multi-channel system, Sony recommends that one of the following groups is selected to avoid mutual interference from other Sony wireless microphones/transmitters:

- Groups 01 to 04 are for using 8 channels of transmitting frequencies in one TV channel.
- Groups 05 to 08 are for using 11 channels of transmitting frequencies in two TV channels.
- Group 09 is for using 16 channels of transmitting frequencies in four TV channels.

Note

The UC25 model only supports use of the 25-XX channels of groups 04, 06, 08, and 09.

Groups 22, 23, 24 and 25 permit the units to operate on 231 carrier frequencies in 25-kHz steps of TV channels 22 to 25.

Notes

- On shaded channels in the tables below cannot be used. The indication of these channels does not appear in the display of the device.
- Simultaneous multi-channel operation is not assured with these groups.
- The UC25 model only supports use of group 25.

Frequency unit: MHz

TV2629

The following tables show the channels and frequencies that are selectable on your wireless microphones, transmitters, and receivers.
For the setting procedures of the channel/frequency on your units, refer to the Operating Instructions supplied with the units.

Group 00

The group 00 permits the units to operate on any of 47 carrier frequencies in 125-kHz steps of TV channels 26 to 29.

Notes

• Simultaneous multi-channel operation is not assured with this group.

Grouping for multi-channel system

When building up a multi-channel system, Sony recommends that one of the following groups is selected to avoid mutual interference from other Sony wireless microphones/transmitters:

– Groups 01 to 04 are for using 8 channels of transmitting frequencies in one TV channel.
– Groups 05 to 08 are for using 11 channels of transmitting frequencies in two TV channels.
– Group 09 is for using 16 channels of transmitting frequencies in four TV channels.

Group 26 to 29 (channel spacing: 25 kHz)

Groups 26, 27, 28 and 29 permit the units to operate on 231 carrier frequencies in 25-kHz steps of TV channels 26 to 29.

Notes

- On shaded channels in the tables below cannot be used. The indication of these channels does not appear in the display of the device.
- Simultaneous multi-channel operation is not assured with these groups.

Frequency unit: MHz

TV3033

The following tables show the channels and frequencies that are selectable on your wireless microphones, transmitters, and receivers.
For the setting procedures of the channel/frequency on your units, refer to the Operating Instructions supplied with the units.

Group 00

The group 00 permits the units to operate on any of 47 carrier frequencies in 125-kHz steps of TV channels 30 to 33.

Note

Simultaneous multi-channel operation is not assured with this group.

Grouping for multi-channel system

When building up a multi-channel system, Sony recommends that one of the following groups is selected to avoid mutual interference from other Sony wireless microphones/transmitters:

– Groups 01 to 04 are for using 8 channels of transmitting frequencies in one TV channel.
– Groups 05 to 08 are for using 11 channels of transmitting frequencies in two TV channels.
– Group 09 is for using 16 channels of transmitting frequencies in four TV channels.

Frequency unit: MHz

TV3436

The following tables show the channels and frequencies that are selectable on your wireless microphones, transmitters, and receivers.
For the setting procedures of the channel/frequency on your units, refer to the Operating Instructions supplied with the units.

Group 00

The group 00 permits the units to operate on any of 47 carrier frequencies in 125 kHz steps of TV channels 34 to 36.

Notes
- Channels on TV-37 are reserved for astronomical purposes and cannot be used.
- Simultaneous multi-channel operation is not assured with this group.

Grouping for multi-channel system

When building up a multi-channel system, Sony recommends that one of the following groups is selected to avoid mutual interference from other Sony wireless microphones/transmitters:

– Groups 01 to 03 are for using 8 channels of transmitting frequencies in one TV channel.
– Groups 05 to 08 are for using 11 channels of transmitting frequencies in two TV channels.
– Group 09 is for using 16 channels of transmitting frequencies in four TV channels.

Group 34 to 36 (channel spacing: 25 kHz)

Groups 34, 35 and 36 permit the units to operate on 231 carrier frequencies in 25-kHz steps of TV channels 34 to 36.

Frequency unit: MHz

TV3841

The following tables show the channels and frequencies that are selectable on your wireless microphones, transmitters, and receivers.
For the setting procedures of the channel/frequency on your units, refer to the Operating Instructions supplied with the units.

Group 00

The group 00 permits the units to operate on any of 47 carrier frequencies in 125 kHz steps of TV channels 38 to 41.

Note

Simultaneous multi-channel operation is not assured with this group.

Grouping for multi-channel system

When building up a multi-channel system, Sony recommends that one of the following groups is selected to avoid mutual interference from other Sony wireless microphones/transmitters:

– Groups 01 to 04 are for using 8 channels of transmitting frequencies in one TV channel.
– Groups 05 to 08 are for using 11 channels of transmitting frequencies in two TV channels.
– Group 09 is for using 16 channels of transmitting frequencies in four TV channels.

Group 38 to 41 (channel spacing: 25 kHz)

Groups 38, 39, 40 and 41 permit the units to operate on 231 carrier frequencies in 25-kHz steps of TV channels 38 to 41.

Notes

- On shaded channels in the tables below cannot be used. The indication of these channels does not appear in the display of the device.
- Simultaneous multi-channel operation is not assured with these groups.

Frequency unit: MHz

TV4245

The following tables show the channels and frequencies that are selectable on your wireless microphones, transmitters, and receivers.
For the setting procedures of the channel/frequency on your units, refer to the Operating Instructions supplied with the units.

Group 00

The group 00 permits the units to operate on any of 47 carrier frequencies in 125 kHz steps of TV channels 42 to 45.

Note
Simultaneous multi-channel operation is not assured with this group.

Grouping for multi-channel system

When building up a multi-channel system, Sony recommends that one of the following groups is selected to avoid mutual interference from other Sony wireless microphones/transmitters:

– Groups 01 to 04 are for using 8 channels of transmitting frequencies in one TV channel.
– Groups 05 to 08 are for using 11 channels of transmitting frequencies in two TV channels.
– Group 09 is for using 16 channels of transmitting frequencies in four TV channels.

Group 42 to 45 (channel spacing: 25 kHz)

Groups 42, 43, 44 and 45 permit the units to operate on 231 carrier frequencies in 25-kHz steps of TV channels 42 to 45.

Notes

- On shaded channels in the tables below cannot be used. The indication of these channels does not appear in the display of the device.
- Simultaneous multi-channel operation is not assured with these groups.

Frequency unit: MHz

TV4649

The following tables show the channels and frequencies that are selectable on your wireless microphones, transmitters, and receivers.
For the setting procedures of the channel/frequency on your units, refer to the Operating Instructions supplied with the units.

Group 00

The group 00 permits the units to operate on any of 47 carrier frequencies in 125 kHz steps of TV channels 46 to 49.

Note

Simultaneous multi-channel operation is not assured with this group.

Grouping for multi-channel system

When building up a multi-channel system, Sony recommends that one of the following groups is selected to avoid mutual interference from other Sony wireless microphones/transmitters:

- Groups 01 to 04 are for using 8 channels of transmitting frequencies in one TV channel.
- Groups 05 to 08 are for using 11 channels of transmitting frequencies in two TV channels.
- Group 09 is for using 16 channels of transmitting frequencies in four TV channels.

Group 46 to 49 (channel spacing: 25 kHz)

Groups 46, 47, 48 and 49 permit the units to operate on 231 carrier frequencies in 25-kHz steps of TV channels 46 to 49.

Notes

- On shaded channels in the tables below cannot be used. The indication of these channels does not appear in the display of the device.
- Simultaneous multi-channel operation is not assured with these groups.

Frequency unit: MHz

TV5051

The following tables show the channels and frequencies that are selectable on your wireless microphones, transmitters, and receivers.
For the setting procedures of the channel/frequency on your units, refer to the Operating Instructions supplied with the units.

Group 00

The group 00 permits the units to operate on any of 47 carrier frequencies in 125 kHz steps of TV channels 50 to 51.

Note

Simultaneous multi-channel operation is not assured with this group.

Grouping for multi-channel system

When building up a multi-channel system, Sony recommends that one of the following groups is selected to avoid mutual interference from other Sony wireless microphones/transmitters:

– Groups 01 to 02 are for using 8 channels of transmitting frequencies in one TV channel.
– Groups 05 to 08 are for using 11 channels of transmitting frequencies in two TV channels.
– Group 09 is for using 16 channels of transmitting frequencies in four TV channels.

The following tables show the channels and frequencies that are selectable on your wireless microphones, transmitters, and receivers.
For the setting procedures of the channel/frequency on your units, refer to the Operating Instructions supplied with the units.

Group 00

The group 00 permits the units to operate on various carrier frequencies in 125 kHz steps of bands 9J, 9K and 9L.

Notes

- On shaded channels in the tables below cannot be used. The indication of these channels does not appear in the display of the device.
- Simultaneous multi-channel operation is not assured with this group.

Grouping for multi-channel system

When building up a multi-channel system, Sony recommends that one of the following groups is selected to avoid mutual interference from other Sony wireless microphones/transmitters:
- Groups 01 to 03 are for using various channels of transmitting frequencies in one band.
- Groups 04 to 06 are for using various channels of transmitting frequencies in two bands.
- Group 07 is for using 14 channels of transmitting frequencies in three bands.
